

## PRODUCT & APPLICATION UPDATE

*Non-Resettable Hourmeter 691026-2, August 19, 2011*

To assist customers in meeting emerging federal and state-mandated air quality regulations, Altronic has released a non-resettable variant of the DH-100 Hourmeter – part number 691026-2. This offering features functionality identical to the standard Altronic DH-100A, but eliminates the ability to reset the device to a zero-hour condition. This packaging and feature set allows operators to conveniently and cost-effectively meet RICE-NESHAP and other clean air requirements which demand a tamper-resistant means of measuring and tracking engine operating hours.
